

TransAct Announces Participation in NACS 2022 in Las Vegas, NV

September 29, 2022

HAMDEN, Conn.--(BUSINESS WIRE)--Sep. 29, 2022-- TransAct® Technologies Incorporated (Nasdaq: TACT) ("TransAct" or "the Company"), a global leader in software-driven technology and printing solutions for high-growth markets, today announced that it will exhibit the BOHA!® suite of hardware and software for convenience stores' fresh food operations at the National Association of Convenience Stores ("NACS 2022") on October 2-4, 2022 in Las Vegas, Nevada. BOHA! is the industry's leading solution that provides convenience stores the choice of applications for FDA-compliant Grab 'N Go Labeling, Digital Food Safety, Tasks and Checklists, Kitchen Production, and Temperature Monitoring of Food and Equipment. NACS show attendees visiting TransAct's booth (#5949) at the Las Vegas Convention Center will see how convenience store operators can leverage BOHA! to enhance their fresh food programs.

"This is a new era where many c-stores are already rivaling fast food brands with their own fresh food offerings. The profit margins for those moving from fuel-focused to include food-focused models have the potential to be massive," said Bart C. Shuldman, CEO of TransAct Technologies. "With BOHA!, food-forward c-stores have the technology to prepare and offer food, faster, safer, and more efficiently while meeting FDA labeling requirements."

The BOHA! suite of solutions will be on full display at booth (#5949) as TransAct demonstrates its ability to dramatically improve grab 'n go labeling with on-demand printing, food prep customized to a location's daily needs, and digital HACCP-compliant temperature taking for food and temperature monitoring for equipment. In addition, TransAct will be showcasing BOHA!'s diverse label offerings such as 1"-3" wide grab 'n go labels and round parfait cup labels to accommodate FDA-compliant nutrition fact panels, along with the capability to build customized and compliant labels on the spot to create new offerings with existing or excess inventory.
