

TransAct Technologies Secures BOHA! Terminal 2 LTE Rollout with Leading National Sushi Franchise

September 19, 2025

HAMDEN, Conn.--(BUSINESS WIRE)--Sep. 19, 2025-- TransAct® Technologies Incorporated (Nasdaq: TACT), a global leader in software-driven technology and printing solutions, today announced that one of the nation's largest sushi franchise operators has approved and placed multiple initial orders for TransAct's new BOHA!® Terminal 2 LTE, totaling 596 units. These orders are part of a broader initiative to modernize the network's 2,108 locations over time, all of which are expected to eventually receive BOHA! Terminal 2 LTE units.

"This deployment reinforces the real-world value of our BOHA! platform," said John Dillon, CEO of TransAct Technologies. "The operator's decision to expand their investment reflects the strong ROI, reliability, and scalability that our solutions deliver. We're proud to support their commitment to food quality, operational consistency, and increased efficiency across a complex network, resulting in better customer experience and enhanced financial margins."

This sushi franchise has long relied on BOHA!'s Build-Your-Own (BYO) labeling capability, which enables chefs to create custom Chef's Specials based on available ingredients while automatically generating compliant nutrition panels, ingredient lists, and allergen disclosures in real time. BOHA! Terminal 2 LTE significantly improves speed, responsiveness, and reliability, helping to address the demands of more complex workflows and supporting consistent execution while improving financial performance without slowing down operations.

[The new LTE-enabled terminal](#) also solves connectivity challenges for franchisees operating inside supermarkets or off-network environments by removing the need for MiFi devices and enabling seamless cloud access and remote updates.

To encourage franchisee adoption, the customer's corporate operations team is running a limited-time promotion to help accelerate the upgrade across its network.
