### Recent Development

The Company announced that it engaged a strategic advisor to assist in determining the best long-term strategy for its business.

### 2024 Financial Outlook

- **Total Net Sales:** The Company currently expects full year 2024 total net sales of between \$53 million and \$58 million.
- **Total Adjusted EBITDA:** The Company currently expects full year 2024 total adjusted EBITDA to be approximately breakeven.

Our outlook for non-GAAP adjusted EBITDA is presented only on a non-GAAP basis because not all of the information necessary for a quantitative reconciliation of this forward-looking non-GAAP financial measure to the most directly comparable GAAP financial measure is available without unreasonable effort, primarily due to uncertainties relating to the occurrence or amount of these adjustments that may arise in the future. If one or more of the currently unavailable items is applicable, some items could be material, individually or in the aggregate, to GAAP reported results.

### **Non-GAAP Financial Measures**

TransAct is providing certain non-GAAP financial measures because the Company believes that these measures are helpful to investors and others in assessing the ongoing nature of what the Company's management views as TransAct's core operations. EBITDA and adjusted EBITDA provide the Company with an understanding of one aspect of earnings before the impact of investing and financing charges and income taxes. The Company believes that these non-GAAP financial measures provide relevant and useful information to an investor evaluating the Company's operating performance because these measures are: (i) widely used by investors to measure a company's operating performance without regard to items that do not reflect the Company's ongoing operations and are excluded from the calculation of such measure; (ii) used as financial measurements by lenders and other parties to evaluate creditworthiness; and (iii) used by the Company's management for various purposes including strategic planning and forecasting and assessing financial performance. Adjusted net income (loss) and adjusted net income (loss) per diluted share provide the Company with an understanding of the results of the primary operations of the business by excluding the effects of special items (for example, the \$1.5 million severance charge related to the resignation of the Company's former Chief Executive Officer) that do not reflect the ordinary earnings of the Company's operations. The Company uses these measures to evaluate period-over-period operating performance because the Company believes this provides a more comparable measure of the Company's continuing business, as these measures adjust for the special items that are not reflective of the normal results of the business. The presentation of this non-GAAP information is not considered superior to or a substitute for, and should be read in conjunction with, the financial information prepared in accordance with GAAP.

EBITDA is defined as net income (loss) before net interest expense, income taxes, depreciation, and amortization. A reconciliation of EBITDA to net income (loss), the most comparable GAAP financial measure, can be found attached to this release.

Adjusted EBITDA is defined as net income (loss) before net interest expense, income taxes, depreciation and amortization and is adjusted for (1) share-based compensation, (2) the \$1.5 million severance charge related to the resignation of the Company's former Chief Executive Officer and (3) any other items, when they occur, that we believe do not reflect the ordinary earnings of the Company's ongoing business. The Company adjusts EBITDA for share-based compensation because the Company considers share-based compensation to be a non-cash expense similar to depreciation and amortization. The Company also adjusts for the severance charge related to the resignation of the Company's former Chief Executive Officer because the Company believes this charge does not reflect the ordinary earnings of the Company's operations. A reconciliation of adjusted EBITDA to net income (loss), the most comparable GAAP financial measure, can be found attached to this release.

Adjusted net income (loss) is defined as net income (loss) adjusted for (1) the \$1.5 million severance charge related to the resignation of the Company's former Chief Executive Officer and (2) any other items, when they occur, that we believe do not reflect the ordinary earnings of the Company's ongoing business. A reconciliation of adjusted net income (loss) to net income (loss), the most comparable GAAP financial measure, can be found attached to this release.

Adjusted net income (loss) per diluted share is defined as adjusted net income (loss) divided by diluted shares outstanding. A reconciliation of adjusted net income (loss) per diluted share to net income (loss) per diluted share, the most comparable GAAP financial measure, can be found attached to this release.
